EDUCATION

Apeejay Styra University, Gurgaon

Bachelor of Technology | CGPA:7.89

Gurgaon

July 2018– May 2022

EXPERIENCE

Software Development Engineer-II

April 2025 – Present

Niit Limited

Gurgaon, India

- Led and developed an **automated course enrollment and scheduling system** that reduced manual intervention and resulted in **INR 3.25 crore annual operational cost savings**.
- Architected and led the development of a real-time analytics dashboard for tracking learner engagement, course performance, and instructor effectiveness across multiple programs and institutions.
- Introduced CI/CD best practices and implemented GitHub Actions for automated testing and deployment, **reducing release cycle time by 40%**.
- Conducted regular code reviews, improving code quality and team productivity.
- Enhanced system observability by integrating **NewRelic and Grafana** for real-time monitoring and alerting across services.

Software Development Engineer-I

July 2022 – March 2025

Niit Limited

Gurgaon, India

- Led the transition from a **monolithic to a microservices architecture**, enhancing scalability and modularity by restructuring core functions into independently deployable services.
- Developed a high-performance **URL Shortener** capable of generating 3,600 unique codes per second with API response times of 80-100 ms, ensuring scalable service delivery.
- Implemented an **n-level hierarchy management system** for institutional clients and training partners, streamlining role-based access, partner tagging, and performance tracking across 1.5 lakh learners and facilitators.
- Dockerized multiple e-learning microservices and migrated them to AWS EKS, enabling faster deployment cycles and improved scalability. Developed a comprehensive learning management module with course enrollment, assessments, and progress tracking features, integrating secure content storage and a high-performance React-Redux interface.

Software Engineer

Jan 2022 – July 2022

Nagarro Pvt Ltd

Gurgaon, India

- Partnered with a major U.S. automotive firm to revamp their used vehicle management solution, integrating an enhanced UI and new features into the existing Provision product.
- Overcame challenges in understanding legacy tools while ensuring continuity of the original product during redevelopment.

PROJECTS

Appointment Booking App | Java, Reactjs, Mysql, Springboot Framework | [Live Demo](#) | [GitHub](#)

- This is a full-stack appointment booking web application built with Spring Boot (Java) for the backend and React for the frontend. It allows businesses to manage their services and availability, and customers to book appointments easily.

MedTrack App – React.js, Spring Boot, MySQL | [Live Demo](#) | [GitHub](#)

- Enterprise-grade medical representative tracking system with a React.js frontend and Spring Boot backend for managing doctors, products, visits, and samples.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Java,

Frameworks/Libraries: NestJS, AngularJS, ReactJS, NextJS, Node.js, SpringBoot

Databases: MySQL, MongoDB, PostgreSQL

Tools/Platforms: Git, Docker, JIRA, New Relic, Jenkins, RabbitMQ, Kafka, AWS (EC2, S3, RDS, CloudWatch)

Architecture & Concepts: Microservices, System Design, Data Structures & Algorithms, SOLID Principles, Design Patterns
